A third call for troops is now under consideration and will probably soon be made.

Gen. Augusti, of the Philippine country apparently knows when he is whipped, or when he is about to be.

It will be good news to the Arizona members of Col. Roosvelt's [command | tending to official business here. to hear that the hospital boats serve ice-cream.

Col. Roosevelt's men have to find another name. Their horses could not be conveyed on the transports and they are no longer mounted riflemen or rough riders.

The great American farmer managed his wheat deal all right. He held on to his grain just long enough. let it go at just the right time, and he is now millions of dollars ahead of the game.

Probably the most costly stopper ever put into a bottle was that with which Hobson and his patriot seven corked up Cervers. The government paid something more than \$100,000 for the Merrimac. But costliness is comparative. The contents of this bottle cost over \$12,000,060!-Ex.

A correspondent of the Washington Post offers this; "Now that the Spaniards are resorting to guerilla warfare, why not advocate to enlistment of Bioux or Apache Indians to fight these modern butchers and mutilators of the dead? The Indian would rejoice in such an opportunity, and his action would seen put an end to Spanish cruelty.

Spain's delay in exchanging Hobson probably is based on the intention to demand a whole regiment of Spaniards for bim.

The cheerful imbecile who insists that there is always plenty of room at the top should take a look at the thermometer.

The Atchison Globe says that if a girl reaches 18 and there is no lover in sight she will keep on going to school until she i+30, if her parents can afford to send her.

The fireworks artists are going to spring a good many novelties on a patriotic public. For example, one New York firm makes two large set pieces of again. the battles of Manils and Santiago. They are 40 by 300 feet and show the forts, tropical landscape and ships. But these are only made to order. Another piece to be brought out is a rocket that throws out Old Glory in fire. Sampson and Dewey shells will be added to the noise makers. Sampson from his slight illness and again able Schley and Dewey batteries fired together throw out a cataract of red white and blue.

The Song of the Cradle.

One of the grandest agencies which enlightened Science has discovered to relieve lightened Science has discovered to relieve motherhood from excessive suffering is the "Favorite Prescription" devised by Dr. R. V. Pierce, chief consulting physician of the Invalids' Hotel and Surgical Institute, of Buffalo, N. V. This wonderful "Prescription" imbues the entire nervous system with natural, healthy vitality; gives elastic vigor to the delicate organism specially concerned in motherhood; renders the prospective mother strong and cheerful and makes the coming of baby entirely free from danger and almost free from pain. The delighted gratitude of Mrs. Pearl Walton, of Alvo, Cass Co., Neb., will find an echo in the heart of every expectant mother:

mother:

"Previous to the birth of my child," writes
Mrs. Walton, "I had no appetite, was sick at my
stomach, had headache, could not rest at night,
was completely worn out in every way. I commeased to use Dr. Pierce's Favorite Prescription
and began to improve right away. I used two
bottles of this great medicine and felt like a new
person. At the time of confinement I was in
labor but a little while and I owe it all to that

Says the Denver R. publican : W. A. "copper king" by reason of his large store, copper properties, was in the city yesterday with his daughter, en route to Arizons, to visit his famous copper mine, the United Verde, reputed to be the richest copper property in the world The price of copper, he says, will undoubtedly go up in value on account of the war and the demand Chiricabuas. This company now own for large ships. No matter when the war ends a number of large battlerhips will have to be constructed by this country, and by Spain, if it can raise the funds, and that means a great demand for copper, which is required in their construction. Mr. Clark said he did not believe the price of silver would increase in the same proportion as copper. He thought it would go over 60 cents on account of the Spanish demand and the prospect of the coinage of the seignorage in this country.

Bad management ke ps more people in poor circumstances than any other one cause. To be successful one must tend look ahead and plan ahead so that when a favorable opportunity presents itself he is ready to take advantage of it. A little forethought with also save much expense and valuable time. A prudent and careful man will keep a bottle of Chamterlain's Colic, Cholera and Diarrhoea Remedy in the house, the shiftless fellow will wait until necessity compels it and then ruin his best horse going doctor and have a big doctor bill to pay besides; one pays out 25 cents, the other is out a hundred dollars and then wonders why his neighbor is getting richer while he is getting poorer. Quite a number of Bishecites leave every excursion for the sea coast, Many will remain in the county and epend the summer morths in one of the many picturesque canyons of the Huschness, While these picnicers will miss the ocean bathing, etc. they will nevertheless have just as much enjoyment and pleasure as their triends on the coest and will be money

The work of examining the applicants for volunteer service still continues and will likely take the most of -b ut forty per cent of the applicants will be accepted, being unable to pass the physicial examination, as a consequence there will be considerable disappointment among the patriotic volunteers. The rigid physicial standard exacted by the government is claimed by many to be too strict, or severe, and is a barrier to proving the patriotism of many who are anxious to fight for their country by going to the front.

How To Look Good.

Good looks are really more than skin deep, depending entirely on a healthy condition of all the vital organs.
